# EUROWAVE

**Eurowave is ideal for the  
treatment of slimming  
and cellulite**

"If you want to lose a few extra inches then why not try out *Eurowave*. This is an electric firming treatment that specifically targets your problem areas. Pads are positioned on parts of the body that you want to work on, like the stomach, hips or thighs. Whilst you lie on a couch an electric signal is sent to these pads via leads. Each signal makes your muscle contract and release as if you were exercising. After just one 18 minute session, our tester had lost a total of five and a half inches stayed off for five days"

*Bride & Groom magazine*

Before

After

It is recommended that 3 sessions are taken in the first week and thereafter 2, are taken per week throughout the duration of your course of treatments for maximum results
